

The beauties of Bignami

“The display of dreams that can come true”.

More than 150 pages of historic, engraved, unique exhibition rifles chosen in the dozens of fairs we have attended through the years. These have often been bought in homage to a passion for collecting which never abandons us, not even when chosen to be then sold..., maybe, even, with a little regret! Let yourself be charmed, and believe it...dreams can come true!

Sauer Gladiator

A living legend, the maximum of style, the most precious Sauer rifle ever made! Whatever you want to call it, this extraordinary piece of gunsmith art, born from an idea of Carlo Berti, manufactured by Sauer & Sohn in cooperation with master armouriers and engravers Hendrik & Marko Frühauf, is already a cult. Every engraving is inspired by a historical font, the stock is made with an "imperial grade" wood and, of course, the rifle presentation opened the world most important exhibition, Iwa 2012, delivering it into history. Who, in the future generations, will have the privilege to take a close look on it, will discover in the Sauer 202 "Gladiator" the absolute refinement and the exceptional love for detail, from the thermal roof to the aqueduct used as rear sight ramp, from the gladiator helmet to the gladiator face that appears inside it. Again, from the reversed thumb on the frame to the "gold" roman empire represented on the bolt handle. The gold inlays carry classical elements as laurus and vexillum...

Ave Caesar, morituri te salutant!

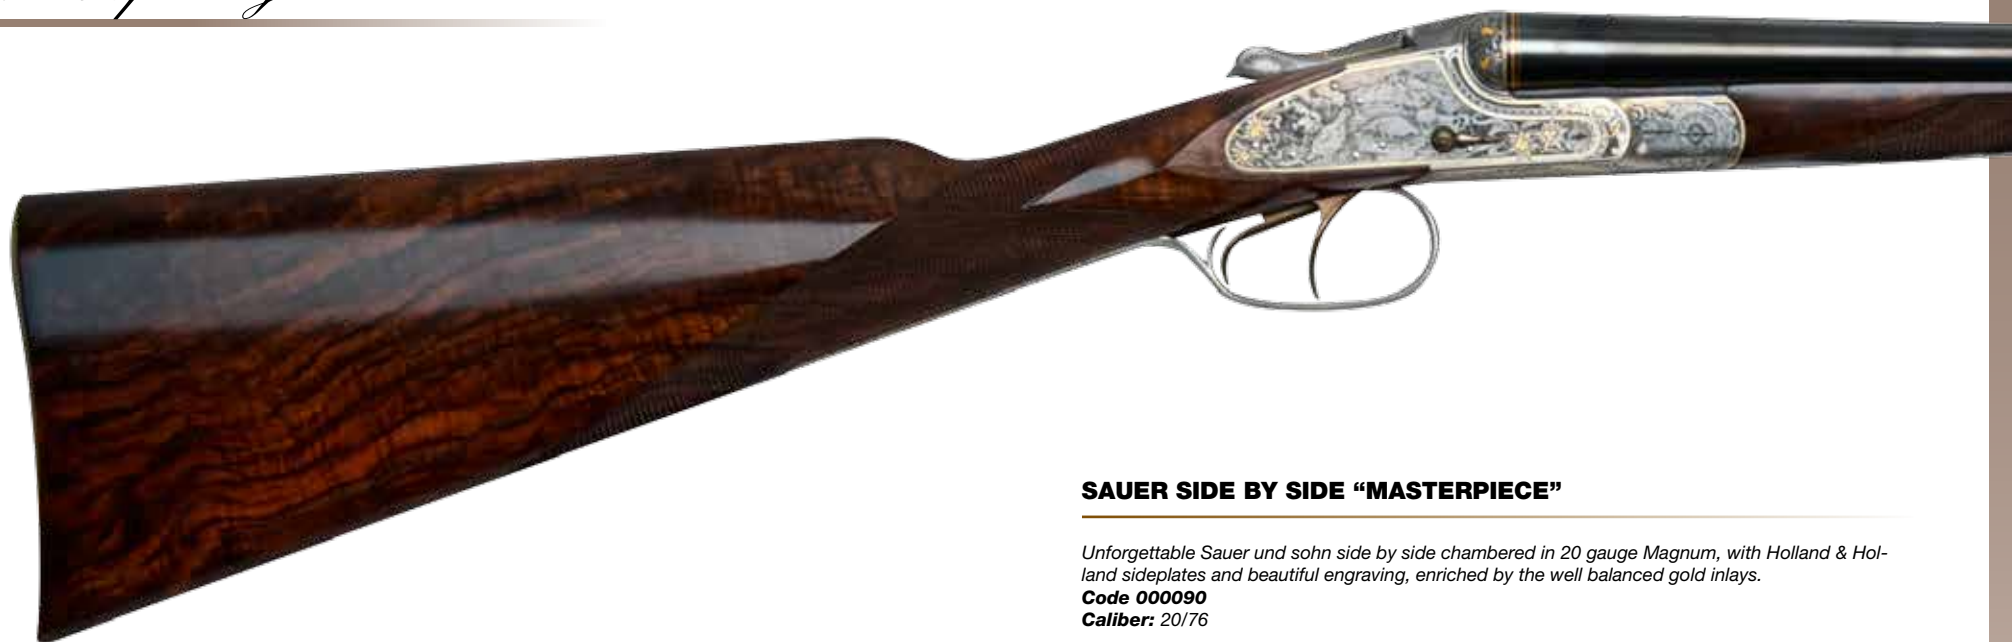

The biggest scene, on the left side of frame, shows a fight between a retiarius and a sannis (sannite), that remembers a lot of frescoes and mosaics, as the famous gladiator mosaic of Galleria Borghese (Rome), or the one depicting Astyanax and Kalendio, in the Archeological national museum of Madrid (Spain).

Code 182844

Caliber: .375 H&H Mag

1. The forend shows a "vexillum" Spqr, made of gold and based on historical pictures.
2. The representation of roman empire on the bolt handle.
3. The gladiator face that appears opening the two helmet front panels.
4. The roman aqueduct and the thermal roof.
5. The thermal roof is detachable, hiding a Pivot-type scope base.
6. The stock pad shows a dead gladiator, carried out of the amphitheater.

Bignami®

dal 1939

A history of passion and innovation ...75 years long.

The history of Bignami begun in 1937, in the backshop of an appliance store in Bolzano, thanks to the resourcefulness of Battista Berti, hunting and shooting enthusiast.

Only in 1939, however, Battista Berti started officially with business, in Ospedale 2 street, always in Bolzano: the gunshop was officially owned by his wife, Giorgina Bignami, and that's the reason for the company name, that remained until now.

That year has been the true beginning for the 75 years of history of Bignami spa. And today again, it's possible to state that this company owes its success to the determination and will to have in its portfolio the most important brands of the market.

The key of the company is clear, evident, and could be summed up with only one word: PASSION! Formidable passion, for hunting, for shooting and for everything connected with this fascinating universe. Passion that continues to pervade the Berti family, leading choices and programs, passion that has managed to transform an interesting activity into something more.

Since that far 1937, much progress has been made.

The small backshop in Ospedale 2 street, has begun a modern, dynamic company, projected to face the future challenges.

In 2012, Bignami spa decided for a complete renewal.

The old main building, 20.000 cubic meters large, has been demolished to build a new 40.000 cubic meters one.

Design and materials, aluminum, wood and glass, give a contemporary appearance to it.

The warehouse, buttonhole of the new building, has been organized with a modern, fully automatic storage system, connected with a new, efficient packaging line. Shelving up to 11 metres high complete the structure, together with cozy and bright offices.

Passion, therefore: so was for Battista Berti, so is now, for the new generations of the Berti-Bignami family.

Passion lives also on the web
